About This Content

Experience the End Times in style! This DLC contains a bold new look for the Empire Soldier Markus Kruber. The new skin is applied when downloaded (to revert, simply uninstall).

Carroburg Livery

The Carroburg Greatswords are one of the most famous regiments in the Empire, with tales of their valour and ruthlessness told from Marienburg To Talabheim. The regiment earned its bloody reputation after the Siege of Carroburg in 1865, where its soldiers successfully defended the walls of their city against the count of Middenland's vast army. Despite the horrific casualties and many wounds they suffered during the battle, the Greatswords fought on resolutely and, by battle's end, their white Reikland uniforms were drenched in blood. From that moment onwards, the Carroburg Greatswords have worn dark red uniforms in remembrance of that bloody battle.

I don't know what is better the humor or the music!

MUST PLAY GAME.

Don't worry about specs or game play. They are for everyone and every computer. A great game for a newbie or a game master. It is a basic old school type RPG that is packed chock full of fun and amusement. It is worth playing this game to the end multiple times. The only thing that is missing is a downloadable soundtrack to buy.. The good, the bad, and the very ugly...

The good:

- +10k GS
- +10% more synergy and vouchers
- +2 points in your fleet strenght

The bad:

rank 6 and 9 ships, neither one of those ships are going to help you get resources for a destroyer\premium\special ship. the increase of your personal storage is also in a cheaper DLC pack, so you get nothing extra from it here. and the same goes for the colouring.

in short, you pay more, but you're not getting more...

The very ugly:

overpriced, even at 50%.. \u2665\u2665\u2665\u2665\u2665. I played the first game and sort of enjoyed it even if it had its faults (pixel hunting, weird puzzles). Curiosity got the best of me and I bought the second part just to see how the story progresses.

This time navigating around the game world is so clumsy and terrible it's practically impossible to find your way around the game world. When you hover a cursor over a medieval village scene half of the screen says "exit". There are actually several different exits, though, but how are you supposed to tell them apart when the open scenery looks like you could go anywhere?

Solving the puzzles is awkward. Half of the time I knew exactly what I was supposed to do, but I wasn't clicking stuff in the right order. Or at the right time. Or I didn't quite find the right spot to click. Sometimes the protagonist clearly said that he can't do this or that, but sometimes he didn't. So I just fiddled around and hoped for the best, basically. Gotta give this a thumbs down, even though I like the atmosphere and the fact that the protagonist is a bit of a d1ckhead.

Oh, and the game is buggy. Better save often or you might lose an item and get stuck in a loop when a cutscene glitches.. I put up with a lot of crap in a game. this game just simply did not get finished. It's a total hack job and I can't help but feel that the game has TREMENDOUS potential, but you have only one speed when controlling the loader and the mouse is totally unutilized (Should control bucket and boom). a massive update or overhaul is required (or heavy modding) to ever get this gamne to a playable state...and I wish it was playable...it actually looks good...enough.. I recommend this to anyone who enjoys the following:

- -Line\/Formation Combat
- -Bayonet Charges
- -Using various commands and tactics to divert attention from the main attack (taking 30 troops around the side of a position and hitting it with constant suppresive fire to distract the defenders from the main assault)
- -Calvary Charges and Tactics
- -Unlockable weapons
- -Battles which can easily be turned in anyones favor if tactics are used.
- -Range guessing
- -Synchronized firing and reloading
- -Single Player FPS-Strategy games (like Ravenfield)
- -Fun but not to insane Ragdoll physics
- -Delaying actions

-----This Game is definitely not for everyone. If you're one of those run and gun COD fan boys then you're going to hate this game more than anything else in the world. You have to time your shots so that you can reload before the enemy is in

range to blast you with a full column of fire. When you enter a column yourself the tactic is to rely on everyone else around you to keep you safe. You move when they, if the guy in front of you dies you take his place. If they advance into a position you have to be ready to enter a heavy melee with axes, swords, and bayonets. Don't invest to much into staying alive because if one man falters the entire formation will start to fall into disarray.

This is not at all a heavy RTS game but it does involve a lot of maneuvering and tactical thinking. If you take control of a group of soldiers, you have to use them effectively. Flanking, Charges, and ambushes are only some of the many things you'll end up doing. If your team is being crushed by artillery then it might be a good idea to grab 30 or so men and go up the left or right side of the map away from the heavy fighting and then sweep away the artillery from the side. Don't plan on surviving that because it is very much a suicide mission unless you really know what you're doing. It does take a while to truly learn what the different commands do and how they should be used but I'd very quickly like to add that you can go into spectator mode at any point in the game and then spawn in by going over to a soldier from your side and pressing f.

Have fun!

A non-biased quick look @ the game:

There's a sense of wonder as you gentle fall into an alien ream avoiding it's dangerous lifeforms. Euclidean; a game of geometric horror; a slow descent into the dark, into madness, futility, and despair, where Things greater than you watch and wait and dream. Struggle for every second of life you have left... Even knowing you're better off dead. - Recommended!. An excellent game I got invested into recently! It's certainly unique from most simulation games I've come across so far, and I'm surprised it hasn't gotten a lot of recognition yet!

I'd definitely recommend this game to people who are willing to challenge themselves into experimenting and seeking little to no help when trying to figure out things. While the puzzles may not be for everyone, it's certainly satisfying when you've created something new (intentional or not) without the guidance of someone.

I also fell in love with the art from the game. I absolutely adored the character designs, most of them being quite memorable in my opinion. The starry aesthetic present throughout the game is also very pleasing to the eye as well.

While the quests were nervewracking at times due to lack of instruction, I'd still say to give the game a try to see whether you like it or not.. How do i play this game? :p. The \u2665\
